Natural Polysaccharides in Drug Delivery and Biomedical Applications

Locust bean gum in drug delivery application

Amit Verma¹, Ankita Tiwari¹, Pritish Kumar Panda¹, Shivani Saraf¹,

Chapter Outline

1. Introduction 204
2. Processing of locust bean gum 205
 - 2.1 Manufacturing principle 205
 - 2.2 Manufacturing aspect 205
 - 2.2.1 Acid peeling process 205
 - 2.2.2 Thermal peeling process 205
3. Composition and properties 206
 - 3.1 Possible impurities 206
4. Synergistic interaction of locust bean gum with other polysaccharides 207
 - 4.1 Synergy with xanthan gum 207
 - 4.2 Synergy with *K*-carrageenan 208
5. Potential for locust bean gum in vivo biodegradation 208
6. Applications of locust bean gum 209
 - 6.1 Development of modified tablet 209
 - 6.2 Microcapsules 211
 - 6.3 Microspheres 212
 - 6.4 Microparticles 213
 - 6.5 Nanoparticles 213
 - 6.6 Gel formulation 213
 - 6.7 Polymeric films 214
 - 6.8 Polymeric beads 214
 - 6.9 Solubility enhancement of poorly water-soluble drugs 215
 - 6.10 Tissue engineering 215
7. Conclusion 218
