OUTLINE

14.1 Introduction	540	14.3 Anatomy and Physiology of Blood–Brain Barrier: Vital Concepts of BBB Drug Delivery	544
14.2 Diseases Related to BBB	542	14.3.1 Blood–CSF Barrier	544
14.2.1 Meningitis	542	14.3.2 Blood–Spinal Cord Barrier	544
14.2.2 Brain Abscess	542	14.3.3 Blood–Brain Barrier	545
14.2.3 Epilepsy	542	14.3.4 Mechanism to Overcome the BBB	548
14.2.4 Multiple Sclerosis	542	14.4 Efflux Mechanisms in Drug Transport to the Brain	554
14.2.5 Neuromyelitis Optica	543	14.4.1 P-Glycoprotein	554
14.2.6 Late-Stage Neurological Trypanosomiasis (Sleeping Sickness)	543	14.4.2 Multidrug Resistance-Associated Protein	555
14.2.7 Progressive Multifocal Leukoencephalopathy	543	14.4.3 Breast Cancer Resistance Protein (BCRP)	555
14.2.8 Alzheimer's Disease	543
