ABOUT THE BOOK

This book is based on principles of elaborative strategies and application of various systems in memory. Formulation of a Imagery Training Module to improve memory is discussed systematically. Author has attempted to find out the impact of formulated imagery training module. The findings of present work have important implications for memory improvement.

This module is found useful especially for elderly people who are suffering from memory losses due to ageing. One of the notable feature of this book is careful effort of amalgamation of theory with practice. This book showed that application of imagery training module can affect all walks of life where memory plays an important role.

Author believes that this work will be important to the research scholar who are working in the field of learning and memory.
