INTRODUCTION

HISTORY OF CLOTHING:-

The study of the history of clothing traces the development, use and availability of clothing and textiles over human history. Clothing and textiles reflect the materials and technologies available in different civilizations at different times. The variety and distribution of clothing and textiles within a society reveal social customs and culture.

The wearing of clothing is exclusively a human characteristic and is a feature of most human societies. Men and women began wearing clothes after the last Ice Age. Anthropologists believe that animal skins and vegetation were adapted into coverings as protection from cold, heat and rain especially as humans migrated to new climates.

Sources available for the study of clothing and textiles include material remains discovered via archaeology, representation of textiles and their manufacture in art; documents concerning the manufacture, acquisition, use and trade of fabrics, tools and finished garments.
