Process of Two wheeler Finance

Introduction

First we will know the actual meaning of finance then we will learn the process of two wheeler finance.

Finance is the process of channeling money from savers and investors to entities that need it. savers and investors have money available which could earn interest or dividends if put to productive uses. Individuals, companies and government must obtain money from some external source, such as loans or credit, when they lack sufficient funds to operate. Finance deals with how and why an individual, company or government acquires the money needed - called capital in the company context - and how they spend or invest that money.

In academia finance refers to the study of the securities and derivatives markets and the institutions that serve as intermediaries to those market and enable the flow of money through the economy. It is also the study of how to determine the value of assest such as stocks, bonds, loans and by extension entire company. Accurately determining value is crucial to sound business decisions. In some cases, such as one company acquiring another or entering a new line of business, Judgements about asset values can make or break the investor.

I think you have been understood the meaning of finance now I will tell the what is the two
