

Bachelors of Library and Information Science

Semester I (2016-17)

Course code	Course Name	Learning outcome
LIS C 111	Foundation of library and Information Science	After studying this paper, the students shall be able to : • Understand the concept of information and the discipline of Library and Information Science. • Get an insight on basic Philosophy of Library and Information Science. • Understand Librarianship as profession.
LIS C 112	Knowledge Organization and Information Processing: Classification Theory (KOIP/CLT)	After studying this paper, the students shall be able to : • Know about basic concept of Library Classification . • Learn about facet analysis and devices. • Understand about the facets of notation and call number.
LIS C 113	Information Technology: Basics	After studying this paper, the students shall be able to : • Get an insight on the structure of computer and functions of its various units. • Know about software components. • Learn about library automation.
LIS C 114	Knowledge Organization and Information Processing: Classification Practice (KOIP/CLP)	After studying this paper, the students shall be able to : • Construct class numbers with simple, compound and complex subjects.
LIS C 115	Information and Communication	After studying this paper, the students shall be able to : • Learn about the concept of data, information and knowledge. • Understand about information science and information society. • Realize the importance of public relations and extension activities in libraries .
LIS C 116	English	After studying this paper, the students shall be able to :. • Understand the concept of communicative English. • Develop vocabulary and improve the accuracy in grammar.

Semester II (2016-17)

Course code	Course Name	Learning outcome
LIS C 211	Knowledge Organization and Information Processing: Cataloguing Theory (KOIP/CAT)	After studying this paper, the students shall be able to : • Understand the concept of library catalogue. • Know about the normative principle of cataloguing. • Understand the current trend in cataloguing.
LIS C 212	Management of Libraries and Information Centers	After studying this paper, the students shall be able to : • Understand the principles and functions of management. • Comprehend the concept of financial management and human resource management. • Carry out various operations of library and maintain library statistics.
LIS C 213	Information Sources	After studying this paper, the students shall be able to : • Understand, identify and explore different types of information sources. • Evaluate various types of information sources.
LIS C 214	Information Services	After studying this paper, the students shall be able to : • Understand about the different information services. • Provide library services using different information sources.
LIS C 215	Knowledge Organization and Information Processing: Cataloguing Practice (KOIP/CAP)	After studying this paper, the students shall be able to : • Use the catalogue codes and standards. • Prepare catalogue entries for various types of information sources.
LIS C 216	Project/Study tour/field work	It will provide practical insight to library work and services.
