

Registration Fee (Non-refundable)

Rs. 350 for PhD and Research Fellows, Postdoctoral Fellows and Faculty Members

Rs. 250 for PG Students

Registration fee includes registration kit and conference meal.

Registration form and fee can be deposited to the Registration Incharge (Ms. Swati Jain, Research Scholar, Department of Zoology)

Certificate of presentation will be provided upon poster/oral presentation.

Paper Presentation Guidelines

Poster Presentation guidelines: dimensions 1x1 meter

Oral presentation guidelines: '10 min - 10 slides' schedule followed by 3 min for discussion

Abstract submission guidelines

File format : MS word only

Word limit : 100 - 200 (graphical abstract may be included)

Text : Times New Roman (size 12), Non-Bold, Single Spacing

Format : Title, authors (underline presenting author), Abstract body, Keywords

Submission of abstract by Email: iscachaptersagar@gmail.com

Best Oral and Poster Presentation Awards

A jury consisting of eminent academicians/scientists and research scholar of respective department will adjudge best oral and best poster presentations among the participants in different categories.

Important Dates:

Abstract Submission deadline: 8th November 2019

Abstract Acceptance Date : 10th November 2019

Registration Deadline : 11th November 2019

About the Indian Science Congress Association (ISCA)

The Indian Science Congress Association (ISCA) owes its origin to the foresight and initiative of two British chemists, namely, Prof. J. L. Simonsen and Prof. P. S. MacMahon. It occurred to them that scientific research in India might be stimulated if an annual meeting of research workers somewhat on the lines of the British Association for the Advancement of Science could be arranged. Association was formed with the following objectives: (1) to advance and promote the cause of science in India; (2) to hold an annual congress at a suitable place in India; (3) to publish such proceedings, journals, transactions and other publications as may be considered desirable; (4) to secure and manage funds and endowments for the promotion of Science including the rights of disposing of or selling all or any portion of the properties of the Association; (5) to do and perform any or all other acts, matters and things as are conducive to, or incidental to, or necessary for, the above objects.

About the University

Dr. Harisingh Gour University (DHSGU), formerly University of Saugar, is a part of rural and suburban environment in the heart of the country. The university has been a centre of higher education for many decades. The university manifests the dream of its founder Sir Dr. Harisingh Gour to provide a congenial academic atmosphere to the youth to nurture potential for excellence. The university has produced many distinguished personalities of national and international repute.

Scope of the Seminar

The focal theme of ISCA (2019-20) "Science and Technology: Rural Development" has greater importance in India today. It is a strategy package to achieve enhanced rural production and productivity, greater socio-economic equality and aspiration balance in social and economic development. There is a compelling need for taking advantage of the recent developments in science and technology in rural areas which is the need of the hour to increase the socio-economic status of the rural population. Science and technology are two crucial components of all efforts aimed at fostering growth and socio-economic development of the nation.

In this context, the proposed national seminar on focal theme is designed to be a Students' "by and for" Research Colloquium. Students at PG, PhD, and Postdoctoral levels are encouraged to organize a seminar for exchange of knowledge and technology for research and development. The seminar is to be planned and organized by students and research scholars of the University, while the faculty members will serve as mentor.

The seminar will provide a unique platform to bring together scientists, academia and industry to deliberate on the important issue of innovations in science and technology for national development. Masters students, researchers, PhD scholars, and Postdoctoral Fellows are motivated to participate and gain merits to their scientific curriculum.
